

MAY 2022

PINERY PIPELINE

From your board of directors

ELECTION RESULTS ARE IN!

You have elected Lisa M. Neal-Graves, Joshua Connors, and Jim McGannon to serve a 3-year term on the Pinery Water and Wastewater Board of Directors.

Lisa and Josh were appointed to the Board last year to fill vacancies of Board members who resigned or moved out of the area. They have come up to speed quickly and are good contributing members to your Board. Jim McGannon has been serving on the Board for several years. He is presently Secretary of the Board and has proven to be a good asset.

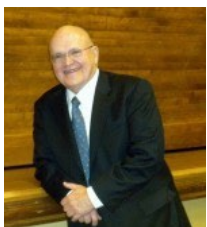

We thank Dennis Volz for his interest in running for the Board and encourage Dennis and everyone to attend our monthly meetings.

All your Board members work hard to fulfill their responsibilities. The Board oversees the operation of the Pinery Water and Wastewater District. They meet monthly to review operating programs and make sure we are staying within the approved budget. The Board's vision is to provide "quality water for life" through long-term sustainability, innovative solutions, fiscal responsibility, and excellent service.

There are several high dollar projects going on throughout the District on a regular basis. They include: reservoir water storage projects, new wells, refurbishing of existing deep wells, pipeline replacements for potable water and wastewater, and of course, maintenance to existing infrastructure. We have just finished an upgrade to the District office to make it safer and fit the growing number of operating personnel.

We encourage you to attend the monthly Board meetings and take the opportunity to see the new office complex.

Thank you for the opportunity to be of service.

**Walt Partridge, Chairman
Pinery Water and Wastewater District
Board of Directors**

Please join us at our District Office for our monthly held Board Meetings at 6:00pm on the 3rd Wednesday of each month.

Upcoming Board Meetings will be held at 6:00pm on
Wednesday, May 18, 2022
Wednesday, June 15, 2022

We will be closed on May 30, 2022 in observance of Memorial Day. We will resume normal hours Tuesday, May 31.

Please call our After Hours line at (303)841-2797 ext 9 for emergencies.

DROUGHT RESPONSE & SUMMER WATERING

In February the Board approved a Drought Response Plan for the District. In this plan staff will regularly monitor the environmental conditions and the District's water demands to make decisions that best serve the community. As discussed in the plan (can be found on the website at <https://pinerywater.com/resources-information/>) staff will compile drought indication information and adjust the Drought Stage Level and response actions according to those listed in the plan. Currently the District is in Stage 2 or Moderate Drought. In Stage 2 staff will ask all customers to adhere to the Watering Schedule voluntarily (shown below). Colorado likely will get much drier throughout the summer and the Drought Stages may increase. In Stage 3 drought, the watering schedule will become mandatory for all customers and the District may prohibit the installation of new sod and the filling of private swimming pools. If you are interested in the current District Drought Stage, it will be posted on our website. Please remember to use only what you need when using our precious limited water supply.

It is easy to use more water in the summer on your lawn and landscape than what you use all year long on everything else. Colorado is a dryer climate with some days that have some high temperatures, but you still don't have to use that much water. Water is a limited resource in our semi-arid, high-altitude climate. Following our watering schedule and tips will help you maximize your summer water usage, save you money, and helps keep our demand as a District down. Look at the 2022 Watering Schedule and some other tips to help you this summer.

Tips:

- Water during cooler times of the day — No watering between 10am and 6pm.
- Water no more than three days per week.
- Do not allow water to flow off grass and into gutters, streets, and alleys.
- Do not waste water by letting it spray on concrete and asphalt.
- Repair leaking sprinkler systems within 10 days.
- Do not irrigate while it is raining or during high winds.
- Use a hose nozzle with a shut-off valve when washing your car.
- **Please remember not to water on Fridays.**

SLOW THE FLOW | SOLVE YOUR SPRINKLERS

Are you struggling to wrap your head around your sprinkler system? Pinery Water and Wastewater District and Resource Central can help with a free sprinkler evaluation. Resource Central Technicians will run a few tests to check your sprinklers' efficiency and diagnose any problems your system might have. At the end of your evaluation, you'll receive a customized watering schedule designed to reduce water usage and keep your lawn healthy and beautiful all summer long!

Evaluations last about 75 minutes and could help you save thousands of gallons of water each year. It's easy to sign up and get long-lasting results! **Registration has begun and their list is first come first served.** Make sure you register sooner rather than later. Simply call (303) 999-3824 or sign up at ResourceCentral.org/Sprinklers.
