

MAY 2023

PINERY PIPELINE

From your Board of Directors

Recent updates for the District:

- **EYE ON WATER.** Staff hope to have the remaining 3% of water meters retrofitted with the new Beacon hardware so that all of you can monitor your water use. If you have not signed into the online application for this great update, please call the office to have them email you the sign-up information, 303-841-2797.
- **Cross Creek (North of Stone Creek Ranch).** Your Board approved an application for inclusion into the District at the April board meeting. This will be a 102 residential lot addition. This inclusion was built into the master plan as it is within the boundaries of the District. Cross Creek brings benefits to our District in terms of access to a future well site and greater control of our service delivery.
- We now have a **new irrigation and water-wise landscape** installed at the main office on Old Schoolhouse Road. Please come by and see the new plants and signage.
- Our volunteer Water Efficiency Task Force has been busy making recommendations for our **Drought Response/Action Plan** that we will implement this year, IF NEEDED. More information to come on this.
- **Pilot Turf Removal Program.** Staff are constructing the framework for the 2023 pilot turf removal program. Interested District customers will apply to the program and those accepted will be eligible to receive a rebate for removal of high-water use material (such as Kentucky Bluegrass) and replacement with low water use material. The District has reserved several Garden in a Box kits that will be available at no cost to participants in the turf removal program.
- **Walker Reservoir** near Franktown is coming along, and we hope to see it completed later this year. I recently toured the site with members of our Water Efficiency Task Force.

If you have any questions or comments for our staff or our Board, please contact us at the office (303-841-2797), or through the website <https://pinerywater.com/>.

Please join us at our District Office for our monthly held Board Meetings at 6:00pm on the 3rd Thursday of each month.

Upcoming Board Meetings will be held at 6:00pm on Thursday, May 18, 2023
Monday June 15, 2023

Jim McGannon
Director
Pinery Water and Wastewater District

We will be closed on May 29, 2023 in observance of Memorial Day. We will resume normal hours Tuesday, May 30.

Please call our After Hours line at (303)841-2797 ext 9 for emergencies.

SUMMER WATERING

It is easy to use more water in the summer on your lawn and landscape than what you use all year long on everything else. Colorado is a dryer climate with some days that have some high temperatures, but you still don't have to use that much water. Water is a limited resource in our semi-arid, high-altitude climate. Following our watering schedule and tips will help you maximize your summer water usage, save you money, and helps keep our demand as a District down. Look at the 2023 Watering Schedule and some other tips to help you this summer.

Tips:

- Water during cooler times of the day — No watering between 10am and 6pm.
- Water no more than three days per week.
- Do not allow water to flow off grass and into gutters, streets, and alleys.
- Do not waste water by letting it spray on concrete and asphalt.
- Repair leaking sprinkler systems within 10 days.
- Do not irrigate while it is raining or during high winds.
- Use a hose nozzle with a shut-off valve when washing your car.
- Please remember not to water on Fridays.
